

*PL*

10. The composition of claim 9 further comprising from about 0 to about 10 parts by weight of a chlorinated paraffin and/or from about 0 to about 10 parts by weight of an aryl phosphate ester as a further flame retardant.

11. A method for bonding articles together which comprises applying a reactive hot melt adhesive composition according to the method of claim 3 in a liquid form to a first article, bringing a second article in contact with the composition applied to the first article, and subjecting the applied composition to conditions which will allow the composition to cool and cure to a composition having an irreversible solid form, said conditions comprising moisture.
